

An ingenious product developed by the  
Research & Development Centre of

for safe and sustainable agriculture.

- 1 A distinct organic product with diverse active compounds.
- 2 A unique granulated botanical pesticide, highly effective at low dosage.
- 3 Most effective in protecting crops from insect damage for a prolonged period due to its slow release action and systemic activity.
- 4 The organic ingredients and its ability to protect the crop during the early stage, helps in boosting crop growth.
- 6 Application of **AVANA** during early crop stages improves the vegetative growth thereby increasing productivity with high benefits.
- 5 A broad spectrum product having activity against borers, defoliators and sucking pests.

#### Dose & Application Methods :

#### paddy

**Crop Stage** 25 - 35 DAT      **Pests** Stem Borer & Leaf Folder      **Dosage** 2.5 kg / acre

**Application Methods**

- Drain the excess water and maintain a thin film of water (approximately ½ an inch).
- Broadcast **AVANA** by mixing with 8 - 10 kg dry coarse sand.

#### sugarcane

**Crop Stage** 10 - 25 DAP/Ratoon      **Pests** Early shoot borer      **Dosage** 2.5 kg / acre

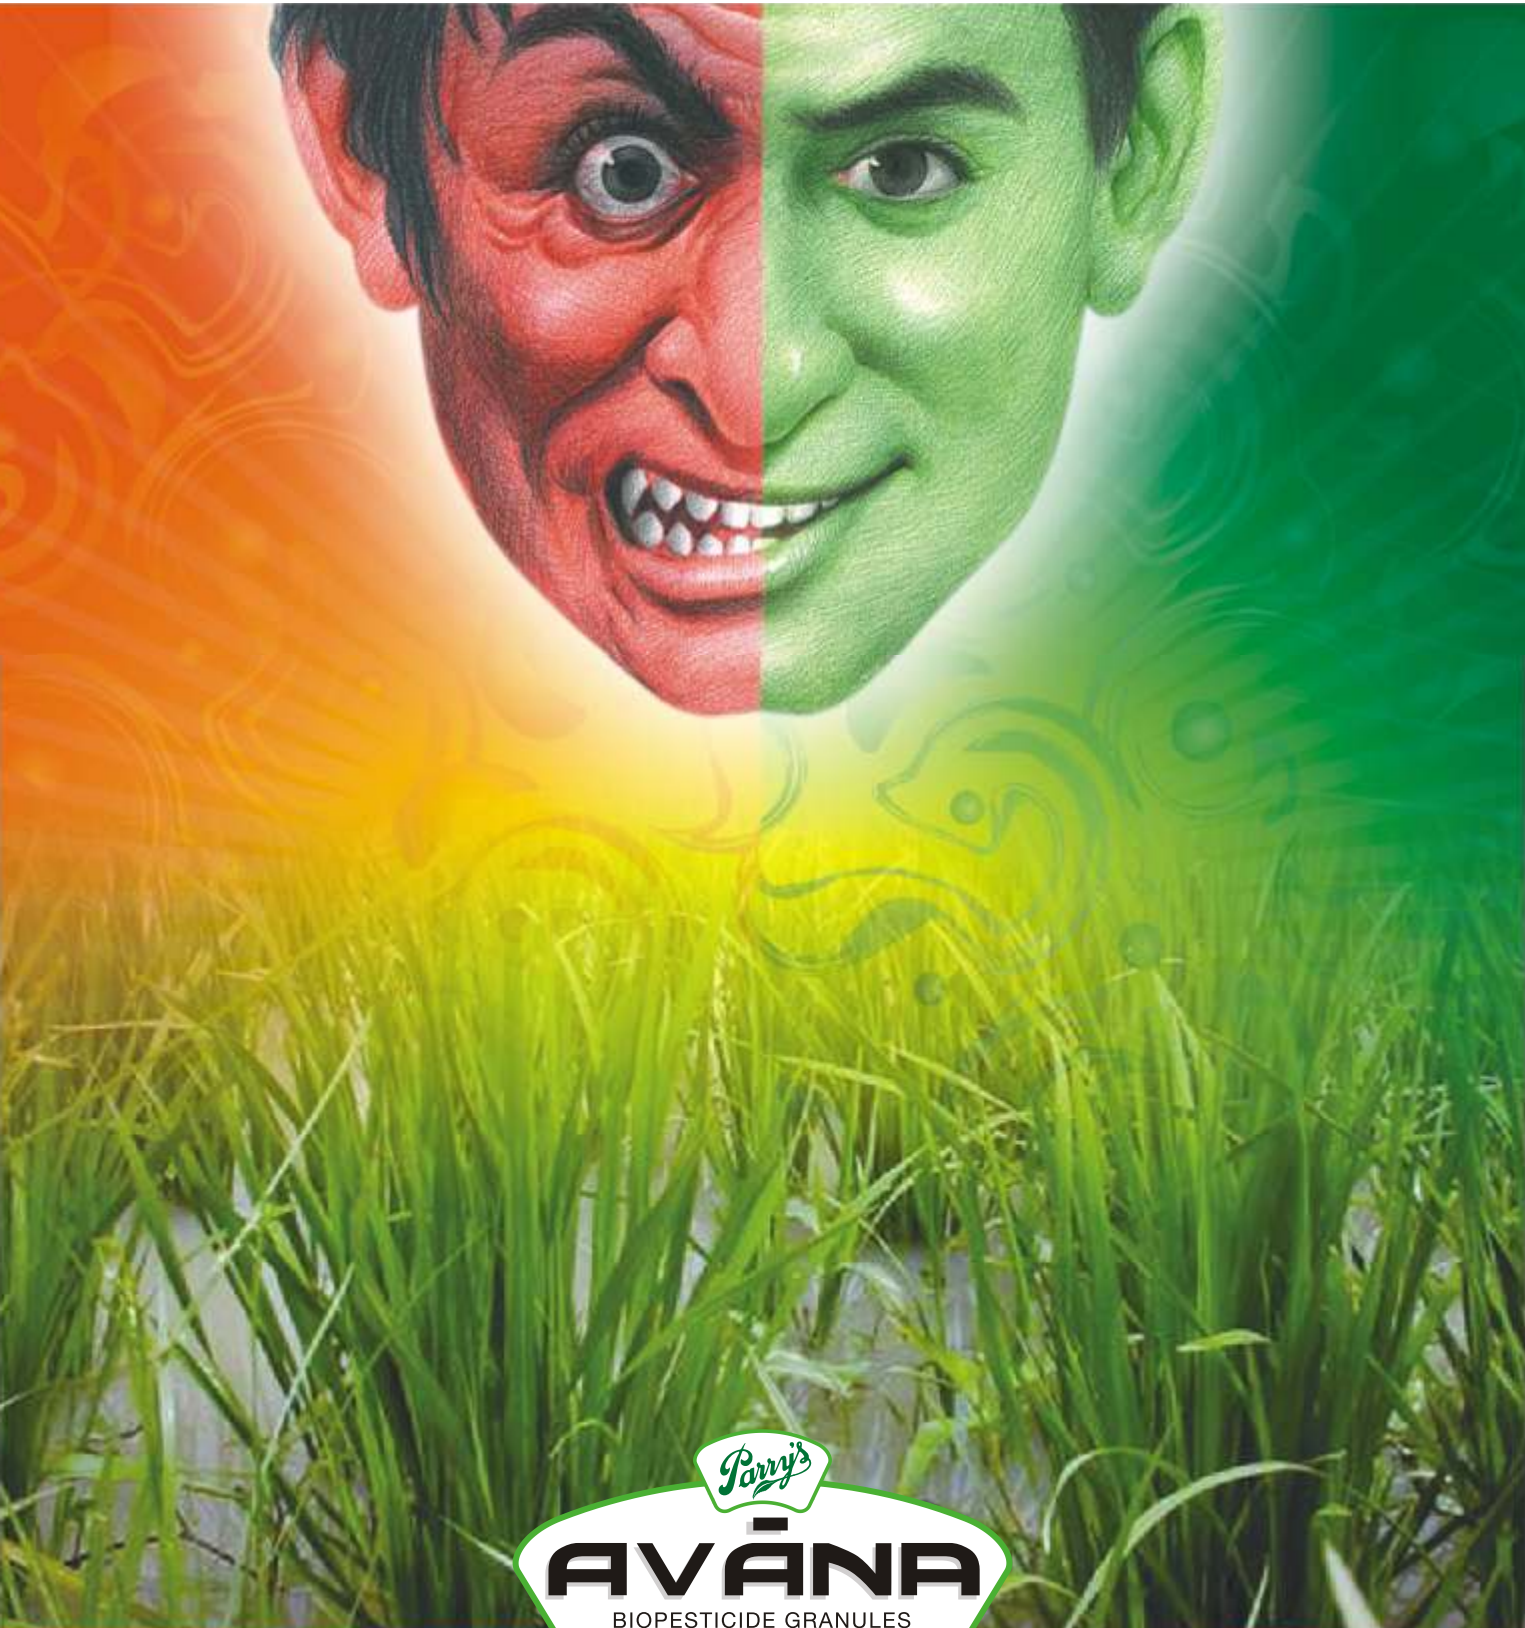

**Application Methods**

- Apply **AVANA** by mixing with 12 - 15 kg dry coarse sand.
