

'Abda[®]' in Sanskrit means 'Season of Plenty'

Abda[®] Gold is a granulated unique plant vitalizer, ensures a plentiful harvest

- AbdA® Gold** is an organic product that ensures balanced Root : Shoot ratio and early establishment of crop.
- AbdA® Gold** stimulates plants for enhanced nutrient uptake which lead to improved yield.
- AbdA® Gold** boosts the thickness of the stem and increases the height of the crop.
- AbdA® Gold** increases leaf area, greenness and chlorophyll content leading to enhanced photosynthesis.
- AbdA® Gold** increases the number of shoots/ tubers/ productive tillers and size of the fruits/ pods/ seeds.
- AbdA® Gold** provides uniform vegetative growth and maturity with higher productivity.

DOSAGE

Mix thoroughly 4 kg per acre of AbdA® Gold with 8-10 kg of river sand or dry soil or premium quality neem cake for uniform spread in the soil either by placement or broadcasting method.

CROPS

Paddy, Wheat, Maize, Sugarcane, Groundnut, Potato / Turmeric / Ginger, Vegetables (Tomato, Chillies, Onion, Brinjal, Bhenidi, Cabbage & Cauliflower), Flowers (Tuberose, Roses, Jasmine & Marigold) and Betel vine.

TIME OF APPLICATION

It is recommended to apply during the early establishment of crops or follow the application schedule as below.

- Transplanted crops : 10-15 days after transplanting
- Direct sowing crops : 7-15 days after sowing or 5-10 days after two leaf stage

TO OBTAIN BEST RESULTS

- Maintain adequate soil moisture at the time of application.
- Ensure uniform application close to the root zone or near to the driplets.
- Avoid excess irrigation immediately after application, which may lead to wastage by overflowing to other areas.
- Broadcast in puddle condition in case of paddy.
- For other crops, irrigate liberally after application.
