Abda

Crop Vitalizer and Yield Enhancer

ABDA - ABDA is a resultant product of a decade of research and field trials of the Bio Products Division of EID Parry (India) Ltd.

ABDA - Granulated herbal agro chemical compound prepared by combining specific herbal extracts in proportionate ratio.

ABDA - Application is easier due to granular form.

ABDA - Environmental friendly, free of side and residual effects.

Notable Beneficial Effects

1. ABDA - Produces balanced root and shoot ratio for the initial establishment of the crop
2. ABDA - Gives an uniform and robust vegetative growth.
3. ABDA - It's slow release mechanism keeps the crop healthy and greenish during the entire vegetative phase.
4. ABDA - Induces disease resistance and pest resistance.
5. ABDA - Increases numbers of productive tillers.
6. ABDA - Ensures uniform crop maturity.
7. ABDA - Even after full emergence of ear head, the flag leaf remains green and the physiological activities go on resulting in increased grain weight with good luster and less number of chaffy grain.
8. ABDA - All the above actions lead to a plentiful harvest.

Treated Untreated

Dosage and Methods of Application

Stage of the Crop	Dosage	Method of Application	
Nursery 2 - 3 leaf stage	4 kg per acre	Apply by mixing with 6 - 8 times coarse sand or Neem cake in transplanted field / puddle field	
Between 0-15 days of transplanting	4 kg per acre	Apply by mixing with 6 - 8 times coarse sand or Neem cake in transplanted field / puddle field	

Caution : There should be sufficient water at time of application of **Abda**.
